DETAILED ACTIONS

Drawings

1. This application has been filed with informal drawings, which are acceptable for examination purposes only. Formal drawings will be required when the application is allowed.

2. The drawings are objected to because:

a.) Examiner suggests applicant label item 40 in Fig. 1 as channel as referenced in specification.

Corrected drawing sheets are required in reply to the Office action to avoid abandonment of the application. Any amended replacement-drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Specification

3. The disclosure is objected to because of the following informalities:

a.) Applicant has failed to supply required application number and date under Cross-Reference To Related Applications.

b.) On page 2, line 10 and 11, applicant uses the reference numeral 21 to refer to both “an input reference signal” and an “intermediate output signal”.

c.) Applicant has failed to supply required application number on lines 14 and 21 of page 5 of the specification.

Appropriate correction is required.

Claim Objections

4. Claim 2 is objected to because of the following informalities:

a.) Even though claim 2 is dependent upon claim 1, examiner suggests applicant re-label the limitations of the claim. Ex: Examiner suggests the use a), b) instead of g) h).

Appropriate correction is required.

Allowable Subject Matter

5. Claims 1-14 are allowed.

6. The following is a statement of reasons for the indication of allowable subject matter:

The instant application discloses method for initializing the filter coefficients of a hybrid frequency-time domain adaptive equalizer. A search of prior art records fail to produce a method comprising, “limiting energy of each occurrence of post-echoes present in said channel to a predetermined value and generating a post-echo profile from said time domain profile; obtaining

Art Unit: 2634

a frequency domain representation (A) of the post-echo profile, and dividing said frequency-domain information A by said channel estimate H to obtain A/H in combination with the remaining limitations of independent claims 1 and 10.

Conclusion

7. This application is in condition for allowance except for the following formal matters:

- a.) Drawing objections as noted above.
- b.) Specification objections as noted above.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
